

MthSc 208: Differential Equations (Summer I, 2013)

In-class Worksheet 6a: Fourier Series

NAME:

Consider the square wave defined by $f(x) = \begin{cases} 1, & 0 \leq x < \pi \\ -1, & -\pi \leq x < 0 \end{cases}$ and extended to be 2π -periodic.

1. Sketch $f(x)$ and find its Fourier coefficients (i.e., a_0 , a_n , and b_n).

2. Write $f(x)$ as a *Fourier series*: $f(x) = \frac{a_0}{2} + \sum_{n=1}^{\infty} a_n \cos nx + b_n \sin nx$.

3. Explicitly write out the first few terms ($n = 0, 1, \dots, 7$) of the Fourier series of $f(x)$.
